

# GANESH SHARMA

Software Engineer (Python/FastAPI)  
Mumbai, India | (+91) 90760-99303 | ganesh27sharma09@gmail.com  
GitHub | LinkedIn

## PROFILE SUMMARY

Software Engineer focused on Python backend development, REST APIs, databases, and AI applications. Hands-on experience with FastAPI, PostgreSQL, SQLAlchemy, React, JavaScript, and Tailwind CSS, with working knowledge of Docker, Git, AWS, and testing. Focused on building clean, maintainable, scalable backend systems and reliable software solutions.

## TECHNICAL SKILLS

**Programming:** Python, JavaScript, SQL, HTML, CSS  
**Backend:** FastAPI, REST APIs, Pydantic, SQLAlchemy, Alembic  
**Frontend:** React, Tailwind CSS  
**Databases:** PostgreSQL, SQLite, Redis  
**AI/ML:** LLM APIs, LangChains  
**DevOps & Cloud:** Git, GitHub, Docker, Linux, Nginx, AWS (EC2, S3, RDS)  
**Testing & Tools:** Pytest

## EDUCATION

**University of Mumbai** Mumbai, India  
*B.E. in Computer Science & Engineering (AI & ML)* 2022–2026

## PROJECTS

**CampusSphere: Multi-User Student & Academic Management System** | *Python, FastAPI, PostgreSQL, SQLAlchemy, React, Tailwind CSS, JWT, Docker*

- Designed a web-based system to manage operations and data for educational institutions with isolated data for different organizations.
- Build a multi-user application with role-based access and a scalable database structure that can support multiple institution instances.
- Developed REST APIs using FastAPI, designed relational database models with PostgreSQL and SQLAlchemy, implemented authentication and authorization, and built the frontend using React and Tailwind CSS.
- Created a full-stack foundation for a multi-user education management platform with separated organizational data and a structure suitable for further deployment and scaling.

**Blog Platform** | *Python, FastAPI, PostgreSQL, SQLAlchemy, React, Tailwind CSS, JWT*

- Built a full-stack blogging application to practice real-world backend and frontend development.
- Implement core functionality for users to create, manage, and interact with blog content through a REST API.
- Developed backend APIs with FastAPI, implemented database models using PostgreSQL and SQLAlchemy, added user authentication and authorization, and built the user interface using React and Tailwind CSS.
- Developed an end-to-end blog platform demonstrating API development, database integration, authentication, and frontend-backend communication..

**AI Document Summarizer** | *FastAPI, LangChain, LLM APIs, PyPDFLoader, TextLoader, WebBasedLoader*

- Engineered an AI-powered document summarization service using FastAPI, providing scalable RESTful endpoints for multi-format uploads, including PDF files, text documents, and web pages.
- Architected a modular processing pipeline for text extraction, prompt engineering, and LLM inference, utilizing LangChain to maintain a unified, easily extensible model interface.
- Implemented robust backend infrastructure, combining Pydantic request validation, comprehensive error handling, and structured API responses to ensure system reliability and seamless data delivery.

## COURSES & CERTIFICATIONS

- Cursa's FastAPI Certification Course
- Harvard CS50's Introduction to Programming with Python (edX)
- Google's AI Essential Course — Coursera

## RESEARCH & PUBLICATIONS

**MITRA AI Chatbot Assistant: Using 8-Bit Quantized Large Language Models on Consumer-Grade GPUs**  
Published in *International Journal for Research in Applied Science and Engineering Technology (IJRASET)*
